EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Cancel non-elected claims 9-33.

Reasons for Allowance

Claims 1-3, 6, and 7 are allowed.

The following is an examiner's statement of reasons for allowance: In combination with the claimed subject matter, the prior art does not teach or fairly suggest switching between an eye-level view and an overhead bird's eye view automatically depending on user movement in a three-dimensional graphical environment. The prior art of record teaches the following: U.S. Patent No. 6,346,938 B1 (Chan et al) discloses switching between an eye-level view and an overhead view, but only in response to selecting a toggle pushbutton. U.S. Patent No. 6,636,210 B1 (Cheng) also discloses an eye-level view, an overhead view, and means for passing over partitions using a continuous viewing perspective, but fails to disclose means for seamlessly switching between the two viewing modes. U.S. Patent No. 6,580,441 B2 (Schileru-Key) discloses another example of two viewing modes wherein both viewing modes are

simultaneously displayed. Lastly, U.S. Patent No. 6,154,211 discloses an inside eye-level view and an outside overheard view, but fails to disclose means for switching between them.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record on form PTO-892 and not relied upon is considered pertinent to applicant's disclosure. Applicant is required under 37 C.F.R. § 1.111(c) to consider these references fully when responding to this action. The documents cited therein teach alternative means for implementing multiple viewpoints within a three-dimensional graphical environment.
